◎ Copy Embed Script

Text2MySite

Step1 – Embed Script

Copy and save the Embed Code. It contains your data-client-id.

Embed Script ✕

Copy and paste this code into your website's HTML.

Embed Code

```
<script
  src="https://www.t2ms.biz/widget"
  data-client-id="cmex8qp650001nz0fjm2hpw0t"
  data-api="https://www.t2ms.biz"
  defer
></script>
```

📋 **Copy Embed Code**

Close
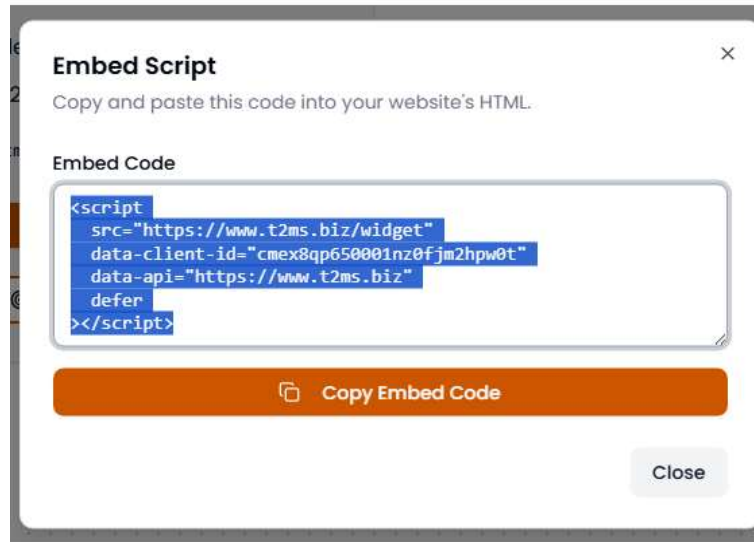

Step 2 – Paste It into Your Website

Many website platforms make it easy to embed a widget on your web pages. We have provided tutorials on various platforms. Please see: (https://www.t2ms.biz/tutorials/). Note: If you have a web person, you can forward them this snippet. Alternatively, a T2MS technician can embed the script for you.

Step 3 – Save and Publish

Visit your site to confirm. Your updates will now appear live.

Step 4 – Configure

Go to Configure to choose the type of widget (banner, popup, ticker or full-screen) style.
